Smirnov proves Olympic standard

Viadimir Smiraov, curreal Ioli Olyappic champion, has won the individual event in tha world championship which is curreally teking piaco si Ciermant-Ferraad, in France. In the phawdown an-conster by beel Romoalos Petru Kuki, who was a worded the silver medal. The bronze went to Asgelo Scuri

FINALS AHEAD

The Brillish and Soviet oihlet-ics teams will take port in tha European Cup finals due on August 15-16 In Zagreb, Yugodevia, Both teoms quolified for the finde by winning the aemi-Onois of the Olympic stodium in Helsinki. On the second day of the competition British ethicles won five evenia; the Finna four events. Twice Olympic champion Yurl Sedykh, from the USSR, won the hammer throwing competition-76 m 38 cm. Sebastion Coo's victory, i min 47.57 sec in the 800 m, deserves special mention.

The semtfinale ended as fol-

lows: Britain—134 points; the USSR — 128; Finland—115.5; then come Yugoslovio, Bulgaria, Sweden and Norwey.

MOTOR BALL GROUND

After capturing its fill European Cup in Troyes, Pronce, the most prestigious motor bett event, which drew the FRG, France, Holtand and Britoin, the Soviel team ouccessfully toured France and the FRG, notably wianing n game ogainst a mixed French-Wesi German team.

For the first time in the history of this sport in the USSR five players on the netional lineup were awerded the title of the Meritad Masier of Spori of the USSR. Commonting on the lour, netionet toom coach Valery Mooin underscated the big progress mode by motor boil to the FRG and o retailvo decitno of the oport in Fronce, o country whore the geme originoled.

Asked whot was . Ihe key to victory he stressed that the main ihing was to rely on ployere's skillful toctical and technical movce rnther than on motorcyclo design. The game is geining in populority in the USSR, he eald, which is altested by the fact there are close on a hundred teams in this country now. The 1982 European Cup, he sold, will be held in the oils. ing city of Donelsk in the Ukraine.

USSR-BRITAIN 212-132

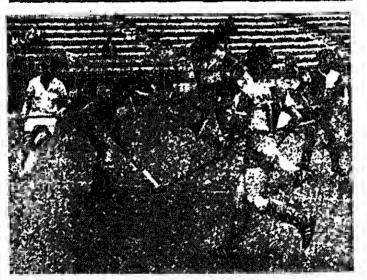

The USSR netionel swimming team beve beolen lineir British counterparte, 212-132. The British lah leam only won alx eveols out of the 29 evente included in the programme. The competition was regorded as very represent-otive. The USSR line-up such exceltent ewimmers os Olympic chemplooo Viodimir Sainikov end Sergei Koplyckov (boli-from Leningrod), Robertos Zulpa (from Vilnius), Sergei Fesenko (from Krivol Rog), Alexander Sidorenko (from Zhdanov) ond Ivor Stukotkin (trom Totlinn).

Soviel coachee looked on Ilila event ae one of the stages to their preparetion for the Europaon encounter to be bold in Split, Yugoslavio.

CONCERN RAISED OVER OLYMPIC SITE

The US Organizing Committee for the Olympice has decided that Loke Casitto, 60 mites from Los Angetee, will be the eceno of the 1984 Otympie koyak and conoe competition. Thie mekes if the first noturol reservoir to host ouch competition to many

According to reports from the Venturo region where the leke is altuated, the decision has led lo wideepread concern among locol residents, who feor the the competition and the inflow of epocialora might potlute the lake, the main cource of drinking water in the region and dversely offect fishing in tt. Concern has been voiced that the area might provo unoble to occomorodote 10,000 eportemen end touriste who are expected to attend the event.

third aalloaal womea'a bockey champlooship continues ta the USSR. Ia Moecow the girls compete oa pitches which were the vaoue for the tost Olympics. SKIF, from Moscow, dawned Sleuilal Taurao, 2-0, it should be added that SKIF is now among the most probable prize wissoro.

STATEMENT OF PATRIARCH PIMEN OF MOSCOW AND ALL RUSSIA

INFORMATION

No. 54 (266), JULY 11-13, 1981

Pairiarch Pimen of Moscow and All Russio has made the following sistement to the press which is represented here in part. The wounds of the World Wer it are still clive. The 40th anniversary of the ossenti of the tascisi Germany on our country with oew elrength sherpened in the hearis of all Soviel people the grateful mectory of our countrymeo fallen ou the Belds of the Berco baltles, of our innumerable brothers and alsters whose lives were paid to win the victory end Independence of our Molberland and the whole humaplty.

Nowedsys the death elouds are inickening egoin. They are effects of the over-occumulation of the sophisticated weapons of mass desiruction in the workl, of the criminal propogands of the permisibility to use the nu-clear means of worforc. All this presents the danger to the very life on the Earth, and the active peacemakers ehould, while it lo loo late, to elruggio againsi it and to avercome it.

Bishops, clergymen, believers and laity of the Russian Orthodox Church fully support the nap-peal of the USSR Support the nap-peal of the USSR Support So-viet to "The Furthenichta and Peoples of the World" and ex-press their firm hope that the Pallementarions of all conciries of the world second and conciries of the world would properly appraise the loffy humanist contale of this document and would do overything in their power in order that the nations of the world ore not cost into the nijconsuming flama of itio nuclear

Woshington, P. Simon, the member of the House of Repres-entativos who headed the dele-gation of US Congressmen which recantly visited the Sovial Union, has called for the quick resumption of o constructive dialogue between the USA and Ihn . USSR.

King Hussein critical of Camp David

radio interview, King Hussein of Jordan has castigeted the anii-Areh Camp David deal, Ho strossed there was no way of reaching a comprehensive astite-ment in the Middle Real within the fremowork of that seperate deal and that American policy in this area provided exclusive bocking for largel.

Jordan, Husssin said, acclaims the peaceful initistives proposed by the Soviel Union. These onvisege the selution of the Middle

East problem with the particlpation of all interested parties, including the Palestine Libereincluding the Palestine Libereition Organization, the sole legitimate representative of the
Arah people of Palosiloe. A fair
and lasting peaco in the Middle
East can only be established, the
King emphasized, on the base of the complete withdrawal of Israell lorces from all occupied Arob territory, including Jerusolsm, and of the implementation of the inalienable rights of the Arab people of Palostine.

All Indicetions are Iliai Begir will be asked to lorin o new government though, in view of the Likud bloc's one vote mojorily, it can hardly be a

Inglon and to eaper ell lis stati.
The US State Dapartment leveled basalass eccusations of "provocativa behaviour" end support for international farrorism"
at the Libyan government,
Yhe "struggle agalest farrorism" thesis is known to be the cornerstone of the cunent American joralgn policy doc-tries. However, in each specific case emphasis on this decirine has been governed by e sum total of quite definite circum-siances, which for various rea-sons have coused breakdowns in diplomacy" end consequent es-esperation on the part of the

The events which gave rise to the "Libyan complex" in the US corridors of power have, like an iceberg, both visible and invisible facets. The visible peri of the icabary is Libye's position on cardinal international issues: in its time the Libyen government sent packing the American end British militery bases on its ferrillery end completely or partially nationalized the foreign of companies. Being both spenses and active mamber of the Frent for Seetlestone and Sections. Lihye has elways opposed the Camp David agreements and the knocking to gether of aggressive military groupings in the Middle A graphic indication of this is

Righly regarding the Palestino problem to be at the core of the Middle East conflict, Libya has always supported the Palo-stina Liberation Organization. Though long racognized by the LIN as the sola lagitimeto rapra-saniativo of the Arab paople of Palestine, the lotter organization is rilli doggodly rolerred to by Washington as a "terrorist organization".

Libya's roalistic view of inter-Libya's roalistic view of infarnational developments and its
unfailing solidarity with paoples
lighting for their liboration noturolly runs ogainst the grain of
tha "big stick" stratagy apelogisir, who unreservadly place e
tog of "infernational farrorism"
on all notional liboration movements without oscoption. As is
wall known tilban itself asked wall known, Libya liseli askod the UN to hold a special conlarance on the light against ter-rorism, justiliably branding it es "a social evil which needs to be studied so that measures to ell-

minale it can be introduced". Amorica, oi course, is fully aware of this, but the ossenliel point of Issue hore is that Washnglen end Tripoli differ in their interpretation of the word "ter-rorism". Much to American displeasure, Libyan leader Gaddall suggested that the UN should clearly disfinguish between "ter-rorism" and "liberetien struggles". At a press conference in ome, Ibrahim Bisher, Libye's Information Minister, had no hesitation in describing the crea-tion of nuclear military bases in

other countries es a manifesta-tion of terrerism and piracy, a comark which clearly referred to the American ruling circles. Among the obvioue causes of the "anti-Libyen comples" is Li-

bya's natural desire to dispose of its oil es it sees ill, without esking enyona's edvice. Libya, accounting for 12 par cant of American oil imports, is that third largest eaporter, of oil to the USA and, in the eyes of the While House, its eacessive independent considerable limits the pendence considerably limits the possibilities of American "active strategy" in Airica and the Middle East.

There are yel other circumstances not always discarnible at lirst gience. The thesis of a "Libyan threat", for instance, is quite officilizally used by the Ponlogen to justilly a marked increase in US military aid to Egypl, Sudan end Liberia.

In short, Libya's policy does not suit the Raegan Administra-tion, which is sparing no effort lo put prossure on the governmant of their sovereign country.
There is every indication to suppose that the expulsion of Libyen diplomets from the USA and the provocative manequeres of the USA and the provocative manequeres of the USA and the provocative manequeres of the USA and the US the 115 6th Fleet off Libyan shoros ere but e prejude to further escalation of the anti-Libyan ballyhoo. "The New York Daily Naws" has reported that the Reagen Administration is drafting e secret plan which envisoges the use of Egypt end other "moderate" Areb states to lopple the regime of the Libyen leader Muammar Gaddell,

Yas, nothing more or less than to topple that regime. What sort of description do such plens desarve — lenge-scale political pir-ecy ar propagandistic bleck-maili Well, descriptions here are beside the point. The in-portant thing is that the world should remember that the hot-haeds in Washington starting with threats are not above resorting to outright terrorism—such was the case in iran, Quelemals, the Dominican republic, Chile and El-Salvedor,

Appeal for dialogue

(Continued from page 1)

Deoplio certain disagreoments which exist botwoon the two countries on some questions, Simon notes in a statement which has been raleased here bolb the Soviet and American peoples ere vitally interested in the eversion of a new world war. The Congressmen are o the opinion that this is the most critical task of the present tima and is only stisinoble when the Soviet Union and the United States join efforts in this direc-

For a long time the problem of lion to get rid of waste puzzled experts from the instant coffee facinry in Bremen, West Germany. Every day about 2,000 lonnes of thick dregs were accuminlated. It fliese were builed in the earth, the soil turned harren, It they got into rivers, the collecgrounds killed off even waterweeds. The solution proved to be a very simple one. The diegs were dried out and made into briquelles, which burn well, They can be used instead of ceal and produce ien times less asi. The environs of the lectory are delighted they have discovered a gold mine. Firelly, they now spend nothing on fuel meking use of the briquettes. Secundly, they derive ennsklemble inceme by setting the briquettes to neighbeuring enterprises which

When determining the global circulation of carbon however, ody the violatity of plenkton was taken into account, and large are plents (marro phylesi were not examined at all. These account ler two-third of blooms to the exemp and play a much bigger role in preserving carbon than plankton.

VITAMIN B ACTS AS MOSQUITO DETERRENT

210 people (acteniisis, ain-dents and local velunteers) teok part in an experiment carried out in the extreme north of Sweden - In a swampy area where gnate abound-by Slockholm docters and hulogists who decided to check out a method used in tropical countrics where it had been noticed that a person whe takes a certain dose el vitamin B becemas invutnerable to both mesquitos and gnala

Por several weeks the participants in the experiment lived tn tants without a mosquito net. They look several vilamin B pitts every day. It was quickly found that solid doses of vitamin B acted as a very effective deterrent fer gnals. Lice aed ticks hated it too.

·Swedish scientists have estabtished that leacts don't tike the smell of the vitamin when it is discharged with sweat. They detact it at a distance of ahout 1.5 metres, if the vilamle irestmant was suspended for a siegis dey, the mosquitos immediately went back le tha attack.

FROM the SOVIET PRESS

A RELAY OF RACISM AND TERROR

President Regyon's Administration has leken over trem its predecessors e "ictuy" el biutani iramen rigilis vielolions in the USA, ond encoumged o policy ol raciam, istrer ond violence, Volerion Zorin, USSR delegole lo the UN Human Righis Commissien, writes in IZVESTIA. The nuthor reminds us of the locts of recent years the bleedy events which took plocs last Aloy in Allomi, the morder of block children and lecnogers in Atlanta City.

At the same time American delegates to the UN do their beat to block decisions ofmed of climinating human rights rigidions in American-booked countries having dictotoriul re-

gimes.
There are a host of UN conventions that America has not yel rotilled: for instance, the UN Convention on the Prevention and Punishment of the Citme of Genocides the Internetional Covenant on Civil and Political Rights, the Internalinnal Convention on Economic, Social and Cultimet Rights of 1666; the International Convention on the Suppression and Punishment of Crime of Apartheid of 1973.

At the lutest 37th session of the UN ttunion Rights Commilesion, ireld in February-Minich (98) in Genevo, the Amerfrum delagation rejected line resolution condemning the policy of terrer pursued by famel in the accupied Arch territories. The cheve locis, concludes the outher, ically is the reactionary and aggressive notins of American policy.

AMERICA IS TO BLAME

Sergel Vishnevsky, PRAVDA's political analysi, writes that Americo is le binme for the interruption in the SALT processions like antiolerni relusol to rollly SALT-1 in 1972 and

As regnide the position of the present American Administra tion, Provide's petitical energy lies the full aving comments.
Before he become position, Ronald Reagan used to say that the 1979 treety eliented be rejected. When this rather negative position had been subjected to widespread criticism. Rengin position and need subjected to interspiced criticism. Renging changed life tone and started saying that he personally was for SALT-2 and that immediately after taking office be would start negotiations with the USSR on this existed.

But an assoner had Roogan become moster of the Intersections that the provides that the largest position by studies that the contact position had been contact to the contact position by studies that the contact position had been contact to the contact position by studies that the contact position had been contact to the contact position by studies that the contact position is a studies of the contact position and the contact position is a studies of the contact position and the contact position is a studies of the contact position and the contact position is a studies of the contact position and the contact position is a studies of the contact position and the contact position is a studies of the contact position and the contact position is a studies of the contact position and the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the contact position in the contact position is a studies of the cont

justify its present position by stuffing that "on octive general re-exemination of the whole SALT arounname is now under way and that the Administration has been working out its pasitua at such negotiothms. Few Western observers believe in Washington's sincerity in this respect.

Alexander Hulg, US State Secretary, statubanny repeals that the 1979 heaty would never be upproved by the Sennie. The President's connecting, E. Alcese mode the following public statement: "Neither lengthy nor mountly ore we hound to observe SALT-1 and SALT-2." In this way agreements of cody touched one quietly harted. And by such behaviour the USA biotonity Heats its International obligations and chows pub hely that it is deceiving its NATO portners since it promised its offices to rully SALT-2. Indeed the fulfillment of this promise was one of the cooditions of the agreement of the NATO countries to the deployment of the new medium rouge oissiles on their territory.

PEKING'S ISLAMIC CARD

VIEWPOINT

'THIRD WORLD' AND THE AMERICAN WEAPONS I

The US presidential directive on arms sales abroad is a challenga to eltoris by the uea-elig-ned countries to save their acurce reseurces for sectel and cenomic dovelenment. As is nuwn, the finnt declaration adopted earty this year in Delht by the largign midsters of lie nue-aitgeed countries emphasred fual the wasteful nems race poses the biggest threat to umanily, ects as a spoke in the wheels of the economic development of many young states, and forms a major harrier to the establishment of a new

world aconomic order, The decision taken by the Reagsa Administratiae deliberaely fostera greatar military colepetitieo and thus provokes new wars and conflicis. The White House chooses to ignore the fect that between 1945 and 1989 these were somo 140 wars involving the armed forces of aver 80 states, with hostilliles osepling on the ferritory of more than 76 countries.

flared up to the "third werld" resulting in loss of property and of tile to hundreds of thous-ands of people and reducing to nought the place of neitonal governments to raise the itving slandards of their peoples, By acnding mere arms abroad, billians of dollars out of develaping constries and accured that these countries would axhansi their strength in trainicidat wars to Americae benefit.

At one time former President Carlar professing the "deleace of human rights" sought to use arms sates to pal pressure en undisguised diciatoriel regimes which discredited US lefernatienal presitgo by their internal policy, lils efforts came to sothing. Today this Carter deciri-ea has been acrapped by the eaw mester of the White House. Launching leio erms sales lo libe "third world" in a big way, America, according to state-massis by its Admielstration of-

geopolitical goals of US foreign pelicy, et the hasis of which tie the so-called Americaa vitat interesia in vertous paris et tha

America la ngainst premettag tha acenomic advancament e weaken lie centrel eves thair internat and tereign pelicy. To make these couelsies too the liee, therefore, America relies ou intimidetion and oo escatsi-

ing milliory psychosts.

il has leeg been cleat that more Americae arms delivaries lo "Ihtrd world" countries witi leavitably aggrevals compell-tion between the individual doveloping ealless. America is daliberalely sending them waapons, atthough le maey places to such countries the smouldering coals of territoriat and ethnic contradictions, left over from the partial of the countries. over from the pariod of colonial domination, still finger on,
Alf this is done to split the

in the Middle. East such policy resulted in an Arab-Isroel con filel which has new been le progress let 14 years. By acely aresing Pakialen, Americ is hullding up a new bothed of military teesion in South-West Seekleg to draw the ASEAN countries into the arms race, America seeks to turn this denacly populated segion in ther zone ot ceeffict.

The Reagau doclries shows that America is primerily coecernad with its owe leteresis. Successive US Administrations have coelinually ignored the requirements of the "third world" and coads it grown under the pressure of currency, aconomic and inflation upbeavers. The Reagan Administration contleves in the localeps of previous American policy. By its sales of arms it seeks to force the "third world" to carry the bruef of American milliony expenditure and fans dangerous millary competition in order fo luther its claims to world do-mination.

CZECHOSLOVAK INTELLIGENCE OFFICER SPEAKS OUT

Prague. The USA had been trying to develop a conflict si-tuation to Poland on the ave of the 9th Emorgancy Congress of the Polish Uolted Workers' Party eed to provoke "Sollderity" to a
whote range of actions. This was
dectered by Czechoelovek intelligence officer J. Hodic et a press conference held here after he had returned home following e three-year long posting to the emigra environment in the West.

FROM the SOVIET PRESS

IN HARMONY WITH NATURE

The might of human society today can only be compared to that of the elements, writes Academicion Yevgeny Fyodorov, in IZVESTIA. Our consumption of certain natural resources considerably diminishes their stocks. This means that we can no larger regard nature and its resources as something inexhaustible, infinite, and airbie. We are becoming increasingly dependent on the environment. Manking should take into occount the size and volume of everything that exists in the

One of the most important problems that has to be solved in the near luture is that of our southern seas. The development of krigotion in Central Asia, for instance, has atapped the flow of fresh water into the Arol Sco. A drail plun has therefore been drewn up Atol 5co. A drail pun has incretore been drewn up for the complete reconstruction of the irrigolien system in the orea. We connot keep lowering the tevel of the Caspion Sea; in order to develop irrigation and to provide water for other nacks of the national economy in the south of the Europeon territory of the USSR, we have to divert some of the water from the tivets of the North and trans it flow into the Volga, The sepa-rollon of the Kara-Bogaz Gol Bry from the Casplan Sca already results in on annual saving of 5-0 cu km content of the Sco of Azov must be regulated when the llow of itesh woice into it is reduced dire to this diversion of considerable port of the wirters of the Kubon River for irrigating the rice

HOW TO BE ON A PAR WITH ONESELF

flow to retain spiritual equilibrium in the face of the wild icmpo of modern life and the kaleidoscope of events and impressions which auround us—such is the subject at an article in SOTSIAUSTICHESKAYA IN-DUSTRIYA by Yuri Airxondrovsky, noted psychologist and doctor of medical scionces.

Every human being possesses o threshold of psychologicul adoptolion which enables him to ochieve a bolanced response to the world which surrounds frim. This threshold is based on biological and soctopsychological tociots. The building blacks of the first

group of lociors ore well known. They include the group of loctors ore well known. They include the critical nervous, cardiovosculor, vegetolive and digestive system. The biological mechanisms governing this threshold are determined above of by genetic and consiliutional sets of lactors. These take shape in early childhood and, as a rule, are not subject to sharp the latest take the shape in the constant of the c changes in loter years.

Alon carnot make drostic changes to his temperament, though he is in a position to iroin his organio systems to heep them in good shope. Of course it is easier to stimulate one's nervous system by drinking o cup of colles rather than by indulging in a series of morning exercises or taking cold shower. We all know the wise old source "In colors can callities space". the wise old soying "In corpore same spiritus same", though we ore not in a hurry to follow it.

The accord group consists of social loctors. These ore The second graup conaisis of social lociots. These are more change-prone and here we are oble to achieve improvements. Motol qualities and alrength of will, together with one's professional skill create on "immunity" to psychological stress. They enable one to take the right decisions of difficult moments actively translate such decisions, once taken, into reality, Characteristic of people in passession of such qualities in their teasanghicaes and coherence. Their mental is their reasonableness and coherence, their mental processes oro silmuloied, their memory improves as do their powers of concentration, Psychological strain does not produce acgotive effects in such people, on the control it helps them overcome difficulties.

s everybody's losk to try ond improve the threshold of adoptotion. In office wards, don't will owoy, always keep yoursell in good physical shops, Train your memory, your powers of response, broaden your ou and polish your professional skills, improve your bosic vlodge and develop your competence.

Only life, struggle, and the overcoming of difficulties give us happiness. Spiritual equilibrium is achieved not through "good-mood pliis" or by the cantinuous erasion of difficulties, but by the fullness of one'n rec-

PROBLEMS OF SETTLING SPACE

Cosmonaui Anaioly Filipehenko apeculales in the TEKHNIKA MOLODYOZHY mogazine on sellement of

The luture selllement of space, to my, mind, has no poralicis on earth because of loo vorying candillons. For instance, ihs Moon has no otmosphere altogether, and there ie practically nothing of it on the Mare, In opening up new lands esitiets did not have to adjust

to much radical changes as they would loce in space. Beatdes, the exploitation of space needs powerful machinery. Man will need not only clottres, water and tood os he does on earth but primurily oxygen and a comforioble microclimale—nnd o closed cycla will be on obsolute necessity there. There is much tolk now obout chierello, o seaweed both goneroling oxygen und quito edible. But this single-cell seoweed is obsolutely unpolotoble, loke my word for it. This necessitotes building some ortificial reservoirs oboard luture spaceships, in which chierello might leed on some other lish or night and thus become additionally the provider that a result of the provider that the provider piont and ibus become edible. Quite possible this would involve many other opculions, in short, there is a host of challenges contronling us... I would wont lo odd that every space seiter has to be also a lirat-role epecialist—which was not required of the eetiters of the

A WRITER SHOULD POSSESS COURAGE

Moral problems and apirituol humon life have glood prominent in modern illustature niongside auch oncient voluce os conscience, kindness, sympothy, compossion, mercy ond pily, Fyodor Abramov writes in the SOVIET-SKAYA ROSSIYA newapoper. All these volues form the spiritual background of every people or nation.

walcomed, even more so that the introduction of changes into life using a ply social means without moral and spiritual effort cannot produce desired effect, it's a i problems can be only plly though that moral capacia have storted to edge off sociol and civio matives in our literature, and have olden acquired a dominant nature or becoming sven lashionesis.

lashionedia.

This is the greatest misconception?

There is no such thing as morelity without social background, outside the lile one's country tives, or morelity outside politics, which has become one of the main spheres of human existence in the 20th contury; such morelity tarns out to be borren and immoral chai. It does not had to remind one of Lee Tolstoy who though all his life had ardenly one fartously been lighting for adity human morality. Even in the darkest days of reaction the groot willer lought against despots and autocraty: It is enough to telor to his ar-

polism and dulocraty. It is enough to felor to his arpolism and dulocraty. It is enough to felor to his arlicle "I Campol Be Silent",
figure, moral activity, man's ability to be loyal toone's voice of conscience and justice—it is a red rolan of today,

THE SCREEN TO BUSINESS

The name of engineer B. Bez-rukov is missing from line list of titles of Sergel Geroslmov's now film "The Youlk of Peter the Great" which was recently re-leased for public viewing. How-sver, Bezrukov played fairly mejor part in the film. At the request of the film director be and a group of specialists from the Murmensk branch of an institute desigoing fishing chips created the ships of Peler Ibo Great's fleet, which were built, se in days gone by, by ahlphuildere at the Solombalsky shipyards in Arkhangelsk,

FROM

In order to bring Peter's fleet back to life, the shipbuilders bad to study bundreds of encient documents, and drawings in order to understand how the old Russian coasiers worked Moraover, the shipe were built, not only just as props, but for real.
When shooting on the film bad
been combleted, these ships, which are able to ride out tough seas and are strong and reliable in navigation were donated to the fishermen of the Ballio Sea, where the glory of the Russian Navy was born. And there this 17th-century flottler built in the 20th century forthlues its kervice. According to an addition on he used specialists, the ships can be used as cargo-vessels, or for fishing in the coastal areas

MH INFORMATION No. 14

Places to visit

The Mescow Region is full of missoums; some of there pre-serve the memory of past builtes, others are linked with the names of great writers and poels, ac-lors and artists. Such is the museum-estete of Abramtsavo 50 km to the north of Moscow, localed in a picturesque toresion a hilly bank of the River

In the mid-19th century Ab rantsevo was the bouse of noted Russian author Serget Aksakov, and Gogol, and Turgeney, his writers, and M. Shchapkin, the scior, and many other outsland ing Russian inisilectuals were frequent visitors to the house. o was at the time one at the centres of inraf life.

On Aksakov'e death, in 1859. life on the estate came to an ebd. But eleven years laint when the estate was bought by Savve Mamontov, who built the Moscow-Yerselavi railroad. life was to burst forth again at Ab. was to burst forth again at Abramisevo with refiewed vigour. Mamontov had a lot of friends, particularly among artists, and Abramisevo became, in its way a studio for the best painters and scuntors of the time is ground the factor. V. Palenov, V. Vianetaov, M. Vrubel, and M. Antokolsky. These painters formed logether in a group called the "Abramisevsky artistic circle". They were united in their passion for the days of

NATALYA BELOKHVOSTIKOVA

to the litar "Teherau-43", directed by Alexander Alay and Vladimir Nauniny, which was shawn at the 12th Moscow la-ternalinnal Litim Festival, Natalya Belokhvasilkova appeared in As a large and the parts at once—she acted Mart, her daughter Natalie, and Mart in old age. This complex triple existence on two liano scales within the transework of an itim demanded all the actrass's ekill, the mare so in that she was required to act Natalio alongside such brilliant masters of the screen as Alaio Delan and Curd Jitrgeus.

The film once again have without to Beachtman

The film nonce again bore witness to Belakhvostikova's remerkable abitity to completely integrate hersall to a part and to bring out its splittual esseace, such an achievement requires a pheaomenal ettori from an actor.

quires a pheaomianal etiori from an actor.

Relokhvositkova does not often reward her laos by eppearing la films: ladeed in Iwelve years she has only starred la ten movias. But each one at its performances is a gem. The actress has only once acted ao locideatal part. Nalesha wae attil at achool of the lime and was apaadlog the hotidays with her pareois, who were diplomsia en puete in Stockholm. It so bappened that one of the oldest of Soviet directors, Mark Donskoy, was abooting his film "The Faithful Mother" shoul Vladimir Lenin, to Stockholm. Yeleaa Fadeyeva, who played the part of Leoln's mother was suddenly taken it!, and Donskoy invited the Moscow schoolgiri to etep lato har ahoes. They enade her up, gave her a wig—and so Natalya made her dabat invited the Moscow schoolgiri to etep lato har ahoes. They made her up, gave her a wig—and so Natalya made her dehal before the cameras. That was her first livis of alrength. Prasumably this aort of work must have altracted her, because the pensive achoolgiri who dreamt of becoming a philologist, decided instead to have a go at films. Incidentally, several years later and already a recognized actress, Natalya gave a billiantly rendering at the part of Nadezhda Konstantinovna Krupskaya, in the film "A llope", directed by the selfsama Mark Donskoy who, in this way, unwittingly became her cinematic "godfalher".

Notalya has been hiessed with many lacky flukes to her lite anabling her to climb the film Olympua while still a college derasimov was asked to tisten to schoolgiri Natasha reciting some poems. She eaded op in his studio, Sha thus made history at the All-Union Institute of Claematography by becoming the first teal b tormar even to altead classes thata, Sha was only in her third year at the institute when she was given the demaading lead roin in Sernat Gerasimous ahe was given.

ing the first teath tormer ever to attead crasses there, she was only in her third year at the institute when she was given the demanding lead roin in Serget Geraumov's two-part film, "By the Lake, and subsequeatly wan the award for the heat famale performance at the Karlovy Vary laternational Plim

Seven years loler, playing Naio in "The Legend ni Thyl", discreted by her husband Vladimir Naamov and by Ataxander Mov, she reached new heights. "Her presence on the screen will slick in one's memory, ead har beautiful and and lock reminds one of all the companie and tractal fractals." All the companies and tractals fractals. reminds one of all the remantic and tragle hereines. Jalici and Greichen, Ophelis and Klärchen were also wonderfull, thus wrote the Beigian "Catel van Antwerpen" stier the film's
